# Bandolier Multi-Purpose Line Charge

The Bandolier is a lightweight and modular explosive system, employable across mobility, counter mobility, and survivability mission profiles. Using a patented hinged tray and sleeve enclosure, the Bandolier bridges the capability gap between large, complex, single-role charges and standard bulk demolitions. The Bandolier's unique modular design is light enough for dismounted operations while remaining flexible enough to meet larger-scale mission requirements.

## Features and Benefits

- **Lightweight** 47% lighter than equivalent explosive capability of C4
- **Modular** compact design enables load distribution between personnel
- **Rapid** in-stride deployment through integrated, adjustable boosters
- **Multi-purpose** application against a range of targets
- **Versatile** conformity to complex target geometries
- **Scalable** design enables mission-tailored application
- **Efficient** consumption reduces explosive waste and excessive standoff
- **Simple** non-mechanical design, with no metallic fragmentation
- **Interoperable** with all standard military spec initiation systems

## Applications

- Steel cutting
- Timber cutting
- Wire and fence breaching
- Concrete/masonry breaching
- Path clearance
- Dynamic entry
- Cache reduction
- UXO/IED remediation
- Underwater demolition

## Specifications

### TOTAL SYSTEM LENGTH

- 35 ft (10.5 m) system
- One (1) 5 ft (1.5 m) module
  - Three (3) 10 ft (3 m) modules

### TOTAL WEIGHT

15 lb (6.8 kg)

### NET EXPLOSIVE WEIGHT (NEW)

- 1.55 lb (5 ft module)
- 2.88 lb (10 ft module)

### TESTING

Meets MIL-PRF 46676B(AR) test criteria

### HAZMAT CLASSIFICATION

UN0048; 1.1D
